

Comm-Tac²

Mobile Interoperability Solution

Comm-Tac²

[Mobile Interoperability Solution]

- | **Comm-Tac²** is a mobile interoperability solution. Create quick talk groups any time, with any mobile radio, on any frequency. Create your own command center.
- | This unit is a six-port cross-patch designed for mobile radio interoperability. Connect up to six radios or other transmit/receive devices into groups for private or group conversation as needed.
- | Each radio channel has separate transmit and receive audio level adjustments available via terminal emulation software.
- | The provided microphone is the point of dispatch for any or all of the talk groups created by your **Comm-Tac²**.

Features

- **Immediate Connection In-Office or On-Scene**
- **Cross-Patch Analog & Digital Radios**
- **Programmable Digital Audio Delay**
- **LEDs with Selectable Brightness Control**
- **Connect Up to 6 Radios**
